

In Norbrook we pride ourselves in being one of the top companies in Northern Ireland and one of the top veterinary pharmaceutical companies globally. We develop & manufacture veterinary medicines, supplying products to 120 countries globally. With a strong portfolio of existing products and significant investment in R&D to launch new products annually, we have opportunities for individuals to join us and develop their career in a global company.

Our business strategy is supported by our Values – Customer Value, One Team, Results Driven, Excellence, Innovation, and Quality – and we support our employees to live the behaviours that creates our culture. Our on-going success is based on the expertise, knowledge and innovation of our employees. If you are interested in joining our team here at Norbrook and supporting our vision, then apply for this role.

Job Overview

Based within Quality Control Section the Data Reviewer will be involved in Analytical Quality Control analysis compilation, responsible for ensuring the accuracy and validity of all analysis conducted within the department. This job focuses on the review and compilation of electronic / raw data and reports generated within the GMP Laboratories. The Data Reviewer will work closely with a range of departments to ensure delivery of commercial release and compliance batches in a timely manner.

Main Activities/Tasks

- Analytical review of all analytical data generated by the QC GMP Laboratories in line with project timelines and all quality, compliance & regulatory requirements.
- Co-ordinate internal review of analytical data ensuring all queries in a successful and timely manner.
- To prepare/review analytical report books and specifications for all applicable data generated by the GMP Laboratories in line with project timelines,
- To update and implement Standard Operating Procedures (SOPs) as applicable for the GMP Laboratories.
- A key player working in a cross-functional team closely with laboratory management, study directors and QA to ensure analytical data and reports are in accordance with requirements.

Essential Criteria:

- A degree in a discipline (Science related or Mathematics/Data analysis) or a minimum of 2 years analytical industry experience.
- Good team player, organised and accurate with strong documentation skills.
- Ability to develop effective working relationships in cross-functional teams and work closely with a range of departments.
- Proven troubleshooting and problem solving skills.
- Self-directed, can work independently, and proactive as a team member, being highly motivated and result orientated.
- Good written and oral communication skills, able to interact positively and professionally with a range of departments.

Desirable Criteria:

- Experience of preparing laboratory method, Standard Operating Procedures (SOPs) and laboratory analytical reports
- Industry HPLC experience and review of electronic data (Empower or similar chromatography software package).
- Previous Data Review experience within a GMP laboratory environment
